

ABSTRACT

A printing apparatus that receives a print instruction, and
5 then obtains and prints print data including plural pieces of sub-data.
The printing apparatus including a print data obtainment unit
(interpreter 1203) obtaining the sub-data, a determination unit
(rasterizer 1202) determining whether or not there is necessity of
further obtaining of the obtained sub-data, by the interpreter 1203,
10 in order to complete printing of the print data, and a notification unit
(communication I/F 1204) notifying a result of the determination, to
a print instruction apparatus which issues the print instruction,
when the determination is made that there is no necessity.
